12 ECOLOGICAL INFORMATION

INFORMATION ABOUT ELIMINATION (PERSISTENCE AND DEGRADABILITY)

Analysing Method: See note below.

Degree of Elimination: > 80 %

Other Information: The product is eliminated in waste water treatment plants by physical and biological means.

Ecotoxicological Effects: Polydimethylsiloxane degrades in soil abiotically to form smaller molecules. These in turn are either biodegraded in soil or volatilized into the air where they are broken down in the presence of sunlight. Under appropriate conditions, the ultimate degradation products are inorganic silica, carbon dioxide and water vapour. Due to the very low water solubility of this product, standard OECD protocols for ready and inherent biodegradability are not suitable for measuring the biodegradability of this product. The product is removed >80% during the sewage treatment process.

ADDITIONAL ECOLOGICAL INFORMATION

AOX Indication: The product does not contain substances which can influence the AOX value of waste water.

Heavy Metals and Compounds (according to EC guidelines NO. 76/464 EC): None

13 DISPOSAL CONSIDERATIONS

Always consult local legislative bylaws. If in doubt hand over to a specifically authorised hazardous waste treatment plant.

CONTAMINATED PACKAGING

Recommendation: Packaging can be reused or recycled after cleaning.

Recommended Cleaning Agent: Water, if necessary, with cleaning agent.
